### CareerLynk – Job Portal Website

Developed a full-stack job portal platform that connects job seekers with employers. The platform supports user authentication, job postings, job applications, and admin functionalities.

Key Features:

- User Roles: Separate dashboards for job seekers, recruiters, and admins.
- Authentication: Secure login & signup using JWT tokens and bcrypt for password hashing.
- Job Application: Users can search jobs, filter by category/location, and apply with resume uploads.
- Admin Dashboard: Manage users, job listings, and reported content.

Tech Stack : MongoDB, Express.js, React.js, Node.js, REST API, JWT, CSS, tailwind

### Weather Locator Application

Developed a web application using ReactJS to fetch and display geographical data, including the longitude and latitude of cities and countries, leveraging the OpenWeather API. The app provides an intuitive interface for users to explore location-specific information.

- Fetches real-time weather data for any city using the OpenWeather API.
- Displays essential information like temperature, weather condition, latitude, and longitude.
- Simple and responsive UI with input validation and error handling for invalid city names.

Tech Stack : React.js, OpenWeather API, JavaScript, CSS

### Personal Portfolio

Designed and developed a personal portfolio to showcase projects, skills, and resume in a clean, user-friendly format.

Includes responsive design, interactive sections, and downloadable resume to enhance professional visibility

Tech Stack: HTML, CSS, JavaScript
